

Wisdom from the Workshop: The Magic of Making Things

with Evan Sanders on Wednesday May 26, 7:30pm – 9:00pm

Making things and working with the hands has long been an integral part of the Steiner curriculum. Steiner was, in many ways, ahead of his time, insisting, in the early part of the 20th Century, that boys should learn to sew and that girls should learn woodwork and metalwork so that both might learn to make beautiful and useful things. But making things goes beyond just being useful. Students arrive at the workshop or the craft room to learn about the practical arts; in reality, they are there to learn about themselves.

In this talk, Evan will showcase different projects that students undertake in their time at Glenaeon. Starting with finger-knitting in the early years, students embark on a journey that takes them from textiles, timber and ceramics, via blacksmithing, leather and stained glass, through to concrete, plastics and 3d-printing. Evan will explore the different inner mindset and outer skills that each of these materials require and discuss the ways that we use the art of marking things to develop students' wellbeing, self-knowledge and resilience on their path to adulthood.

- **WHEN**
Wednesday May 26 7:30pm – 9:00pm
- **WHERE**
Marion Mahony Griffin Hall
Glenaeon Castlecrag Campus
121 Edinburgh Rd, Castlecrag 2068

Evan Sanders teaches Design & Technology at Glenaeon from years 5 – 12 and is a Glenaeon graduate himself. He has degrees in Education and Digital Media as well as an Advanced Diploma of Rudolf Steiner Education. Also experienced in music & drama teaching, web development and theatre production, Evan is passionate about the intersection of technology and creativity
